Yeast and Mold (Rapid)	AOAC 2014.05	100	Record Only	None Detected	cfu's/g	8/20/2026	1*

This independent laboratory test found no detectable total plate count, coliforms, yeast or mold, and confirmed the absence of E. coli, Salmonella and Staphylococcus aureus in the sample tested. Based on these results and the product remaining sealed, dry and properly stored, we estimate that the collagen has a reasonable likelihood of remaining microbiologically safe for at least another **6-12 months** while updated shelf-life testing is completed.

[†]Method Detection Limit (MDL):

In microbiologic testing, this is the minimum level of growth that can be detected with confidence. If a result is reported as "None Detected", it means any visible growth was below this limit.

[†]Limit of Quantitation (LOQ):

In analytical chemistry testing, this is the minimum level of the desired analyte that can be quantified with confidence. If a result is reported as less than LOQ, it means any detected amount was too small to report an exact number.
